# BENCHMARK

- The New Standard Reactive Hybrid veneer provides the perfect amount of traction in order to work on most typical house patterns and a variety of medium volume tournament patterns. The N.S.R. Hybrid cover is three parts solid and one part pearl, giving it ultimate mid-lane control and backend recovery.
- The 800 Abranet™, 1000, 2000, 4000 Abralon® finish can be altered with more surface or polish to meet the bowler's needs.
- The medium RG Tri-Rib core enhances the Benchmark's ability to read the mid-lane without sacrificing backend recovery due to its medium to high differential.

- Recommended Cleaner:  
Powerhouse™  
Power Wash
